SPECIAL SCREWS FOR RAILROAD AND MINING OPERATIONS

THREAD ROLLING OPERATIONS:

Machines:
WRL3009TS and HRL3020 series

Capacities:
500-720 parts per hour

Advantages:
Combining stamping and rolling operations reduces the cost of manufacturing by up to 50 - 60%
ERS Engineering Corp. is an exclusive representative of AMTengineering.

AMTengineering specializes in design, engineering, and manufacturing of equipment for the metal-working industry.

Over the years of successful operation AMTengineering has assisted its customers in increasing profitability and discovering new business opportunities. AMT’s main goal is to meet and exceed its customers’ expectations and become the most advanced and respected metalworking equipment supplier worldwide. The AMTengineering’s floor space, including its engineering center, is about 8000 square meters. At present, the company employs nearly 190 people (including 76 design engineers). Many years of research activities and design developments are reflected in the high quality of AMT’s equipment. Since the company started operations in 1999, it has received 42 patents for various types of equipment and special tools.
